BATTLETECH SPECIAL

Although *BattleTech* is technically a boardgame, it also lends itself to play with miniatures. The game comes with fourteen excellent 1/285th scale miniatures of the most popular mechs. This cover-special has been specially devised in order to enable you to play the game with miniatures. We will send you:

- ❑ The complete boxed game *BattleTech*. This contains 14 plastic mechs, two 22" x 17" maps, mech record sheets, dice, and 56 page rulebook, which is the perfect introduction to playing *BattleTech*. It contains all the rules required for using mechs, heat build-up, piloting skills, critical hits, physical attacks, movement, combat, etc. There are 4 scenarios, details on the Successor States, Mercenary Companies, Bandit Kingdoms, Mechwarrior Families (mechwarriors are basically future knights), & regimental organisations.
- ❑ A copy of *BattleLance*, a 32 page booklet that adapts BattleTech to streamlined play with miniatures. This is the 4th edition, the 3rd edition being contained in *White Metal*. This is *not* a FASA product.
- ❑ A copy of *White Metal*, which contains photos of nearly all of the superb Ral Partha BattleTech metal miniatures.
- ❑ A large resin sci-fi building by Fantasy Forge, worth $12.00 - $27.00, that goes beautifully with the miniatures. (I use over a dozen in my games of BattleTech.)

WARHAMMER 40,000

At long last, the eagerly awaited new rules for *Warhammer 40,000* have been released. Instead of a single book, the new *Warhammer 40K* comes as a value-packed boxed set along the lines of Warhammer Fantasy. The game includes 80 detailed 25mm plastic miniatures: 40 Gretchins, 20 Space Ork Goffs, and 20 Space Marines (2 squads), including 14 bolters, 2 sergeants, 2 missile launchers, & 2 flamers. There is a rulebook, Wargear Equipment book, Codex Imperialis background book, ruined buildings, burst templates, counters, and cards for Wargear, missions, vehicles, dreadnoughts, etc.

The rules have been greatly improved. Intelligence, Will power & Cool have been replaced by Leadership, so only one roll is required for all psychological & break tests. Movement has been changed: reserve move has been replaced by the *run* move. Possibly best of all, Space Marines have been seriously upgraded in performance. Their toughness has been raised, they can use double bolter fire if they do not move that turn, they can ignore their first break test failure, & they have an improved saving throw for their armor. There are a limited number of moves in which to achieve your objective. Vehicles have been streamlined, with the targeting template removed. Game includes a free 40K Codex Book with temporary army lists.

WARLORDS

What, $4.00 for a complete boxed wargame? What's wrong with it? Nothing - we've just got a *lot* of them! *Warlords* contains 1 full color map 490mm x 590mm, 2 flashy full color, double sided counter sheets, a 16 page rulebook, display track card, 3 ready reference cards, and 1 dice.

The game is about political diplomacy and military expansionism in China from 1916 - 1950. It is for 3 to 7 players, who take control of the warlord factions, Japan, and Chinese Communists, each vying for supremacy. With the ultimate aim of re-unifying or controlling China, players must wheel and deal, bribe, coerce, plot, and fight their way to politcal, military and economic victory. The rules are a simple, move-fight system with a few basic guidelines for diplomacy. Complexity can be increased to include other advanced rules. Revenue is collected from taxation, foreign aid & bribery, and must be allocated to buildings, maintainence, & armies. Famine & revolts must be dealt with, as well as the opposing players & their schemes and policies. Movement is by areas on the map, units are armies, and there are three scenarios and a complete campaign from 1926-1950. Good fun!

WRG ANCIENTS RULES HISTORIC

WRG **ANCIENTS RULES 7th Edition**
Wargames Research Group's 3000BC to 1485AD rules. Each figure (of any scale - 6mm to 25mm) represents 50 men. All troop types (from archers to elephants), weapons, formations, & tactics for the period are included in this 48 page book, plus reference card. All troops are based and fielded in elements, of either 2, 3 or 4 figures per base. The rules include historical background, field engineering, fortifications, unusual 'terror' weapons, & basic strategies. **$16.00**

WRG **ARMY LISTS Volume # 1 Ancient Near East 3000 BC - 500 BC**
Until now everyone's been using the 6th Edition's three army list books, which are not really compatible with 7th Ed. This first new army list book is 77 pages in length, and covers all the armies of the Ancient Near East from 3000 - 500 BC. Armies included are: Babylonian, Assyrian, Hyksos, Egyptian, Hebew, Philistine, Etruscan, Early Greek Hoplite, Spartan, Thracian, Achaemenid Persian, armies of the Persian wars, Phillip II Reformed Macedonian. Each army entry includes foot notes regarding tactics, history, troop types, & some maps. **$16.00**

WRG **ARMY LISTS Volume # 2 Armies of Far East, Asia, America**
A 90 page book of army lists for the Far East, Asia, and America. Some of the armies covered are: Later Shang Chinese, Early mounted Nomads, Hsiung-Nu, Han, Three Kingdoms Chinese, Early Medieval Indians, Kirghiz, Khmer, Medieval Vietnamese, Khitan-Liao, Sung Chinese, Mongol, Japanese (early, to late), Aztec, Inca, Mayan, etc. Includes foot notes, descriptions, maps. **$16.00**

WRG **DE BELLIS MULTITUDINIS Mass Ancient & Medieval Combat**
I've got four complete 15mm Ancient & Medieval armies, which I had based for using with WRG 6th Edition Ancients. I loved the rules so much that I'ved played around 4 games in *sixteen* years! And 7th Ed Ancients rules inspired me so much that I could not even be bothered rebasing the armies, so I've never even played it. But DBM (De Bellis Multitudinis) is **so good** that while on a holiday, I played 7 seven games in four days, and immediately began rebasing all of my armies the moment I got home (both historical and 25mm fantasy).

No kidding, these are the **best** set of ancient and medieval miniatures wargames rules around. They are simple (just 36 pages), with the most elegant combat system I've seen. You can play with either 25mm, 15mm, 6mm or 2mm figures. All figures are based in elements. eg, all 15mm troops are placed on a base 40mm wide. This has 4 close order infantry, or 3 cavalry or loose order infantry, or 2 light horse or open order infantry, or one elephant or chariot. There are nineteen troop classifications (eg, spears, knights, light horse), each having up to five grades (such as Superior or Fast), and all are either regular or irregular. The combat system is pure magic - only two pages long. And the most important things are the flanks on each one of your elements - each *needs* to have another element on either side. All units have a combat factor against foot and horse. When two elements fight, each player adds 1D6 to his combat factor, and there are a few combat factors to be added or subtracted. If inferior troops score lower than their enemy, they receive a further - 1 (ie, fight goes against them & they lose heart), whereas if superior troops score lower, they get + 1, ie, fight goes against them but they're tough so they just lump it. Normally, if one element scores up to double it's opponent, the opponent retires it's base width. But there are lot's of exceptions. If knights (which includes troops such as cataphracts & Macedonian Companions) recoil spears, pikes, warband, psiloi, etc, they are destroyed. If psiloi recoil elephants or suicidal chariots, they are destroyed. If one element scores double or more than it's opponent, their opponent is normally destroyed - but again there are many exceptions. Foot elements that score double that of light horse, can do no more than make them flee for one turn. Also, spears, pikes & blades (which includes Legionaries etc) can only ever be recoiled by light horse. Psiloi can only be destroyed by mounted troops, bowmen, or psiloi or auxilia. Otherwise they flee.

There is also a magnificent command system. Each general (usually have 2 to 3, each with his own command) throws 1D6, and this is the number of actions that general can perform. Generally, an element or group (elements in base to base contact) will cost one pip to move if regular, or two if irregular. Light troops are always 1 pip. They really are *excellent* rules. **$16.00**

WRG **DBM ARMY LISTS Book # 1 3000 BC - 500 BC**
A 54 page book of army lists written especially for DBM. The average size of armies used with DBM is between 300 - 500 points. I recommend 200 points for 25mm, which is around 30 elements or around 90 figures; or 375 points for 15mm, which is around 60 elements or 180 figures. This book includes notes on each army, rules for using allies, climate, aggression, and terrain types for each army, etc. Armies included are: Egyptian, Syrian, Assyrian, Babylonian, Mycenaean, Trojan War, Early Hoplite Greek, Thracian, Early Macedonian, Roman & Etruscan, Early Achaemenid Persian, Early Carthaginian, etc. **$16.00**

WRG **DBM ARMY LISTS # 2 500 BC - 476 AD**
A 76 page book of army lists, including some of the Ancient period's greats. Later Hoplite Greek, Alexandrian Macedonian, the Successors, Camillan, Marian, Early, Middle, Late, & Patrician Roman, Hunnic, Alans, Gallic, Hsiung-nu, Armenian, Ancient British, Sassanid Persian, Early German, Visigoth, Vandal, Pictish, Saxon, and my favorite - the Parthians. The first seven games I played of DBM were of Parthians fighting Marian Romans, and I immediately fell in love with the Parthians. The cataphracts are rated as being Knights(X),ie, exceptional. This means that they are classed as superior against spears, pikes, horse, & bowmen, but inferior against blades, knights, or warband, ordinary in all other cases. And moving 150 paces, they are basically fast super heavy infantry, and very close against legionaries. But the horse archers! They were wonderful. Zipping all over the place and totally invulnerable against any enemy foot. **$16.00**

WRG **DE BELLIS ANTIQUITATIS Fast Play Ancients Rules**
Wargames Research Group's fast play ancient & historical miniatures rules. Game mechanics are a simplified version of DBM, using the same basic concepts. One major difference is that all armies consist of 12 elements or bases of figures, which means that no army can have over 50 figures. There are no point values. It is a 20 page book containing simple yet effective mechanics that cover troop definitions, terrain, camps, close combat, missile fire, artillery, etc. Includes a suggested six nation campaign, historical army lists, all of which require only a small number of figures. Very suitable for 25mm, 15mm, or 1/300th scale games. **$7.50**

WRG **HORDES OF THE THINGS**
A 40 page book of fast play fantasy miniatures rules, using a system very similar to DBA. All armies consist of 24 points, and can include the troop types aerial hero, god, dragon, paladin, behemoth, magicians, heroes, airboats, artillery, sneakers, clerics, flyers, knights, riders, beasts, blades, spears, shooters, warbands, hordes, and lurkers. Large battles can be played, simply by adding further generals, each of which commands 24 points. The average 24 point army will include 24 - 36 figures. Combat is very similar to DBA and DBM, and so the game is extremely fast moving and easy to learn. *Hordes* are done in a novel way. If one is eliminated, the next turn you can replace it by spending one command pip, and it arrives in your stronghold or back board edge. **$16.00**

WRG **ARMIES OF MACEDONIAN & PUNIC WARS 359 - 146 BC**

WARHAMMER 40,000 — SCIENCE FICTION

GAM **WARHAMMER 40,000 BOXED SET**
At long last, the new rules for Warhammer 40K have been released. Instead of a single rule book, the new Warhammer 40K comes as value packed boxed set along the lines of *Warhammer Fantasy*. The game includes: 40 Gretchins, 20 Space Ork Goths, 20 Space Marines (2 squads), including 14 bolters, 2 sergeants, 2 missile launchers, & 2 flamers. There is a rulebook, Wargear equipment book, Codex Imperialis background book, ruined buildings, burst templates, counters, cards for Wargear, missions, vehicles, dreadnoughts, etc.
And best of all, the rules have been greatly updated. Intelligence, will power & control have been replaced by Leadership. So only one roll is required for for all psychological & break tests. Movement has been changed: reserve move has been replaced by the *run* move. Possibly best of all, Space Marines have been seriously upgraded in performance. Their toughness has been raised, they can use double bolter fire if they did not move, they can ignore they first break test failure, & they have an improved saving throw for their armor. There are now a limited number of moves inwhich to achieve your objective. Vehicles have been streamlined, with the targeting template removed. Special equipment is treated like magic in *Warhammer Fantasy,* with each having it's own card. This game includes a free 40K Codex book of temporary army lists, to be used until the new army list books come out. **$99.00**

GAM **CODEX SPACE WOLVES**

IBM NEWS - ONLY 3.5" FDD

In the USA over 80% of all software sales are for 3.5" disks, so manufacturers are now ceasing to make games with 5.25" disks. We therefore urge all customers to visit their local computer stores and have a 3.5" FDD fitted to their machines. The average price for a 3.5" disk drive is $90.00, plus a $10.00 mounting bracket. (So it costs about the same as the average game.) We have listed in the following game descriptions which games are available in which formats. Please take note! Please also note that we *cannot* convert 3.5" games to 5.25", as the 5.25" disks are smaller.

PRE WORLD WAR I

BATTLES OF THE U.S. CIVIL WAR Vol 1 — **SSG**
Six scenarios, from the War between the States - the first Bull Run, Shiloh, the second Bull Run, Antietam, Fredereicksburg and Chancellorsville. With an easy-to-learn menu system, plus the 'Warplan' wargame construction set and the 'War Paint' graphics editor for detailed scenario creation. This is the first program of a very detailed military history trilogy that represents the definitive computer-study of the U.S. Civil War. *Available on 3.5" FD only.* **IBM - $45.00**

BATTLES OF THE U.S. CIVIL WAR Vol 2 — **SSG**
Covers the war's middle years, with scenarios of the battles for Chatanooga, Chickamauga, Gettysburg, Gaines Mill, and Stones River. The American Civil War was becoming more drawn and closely contested - success purchased with blood & determination now could later determine the conflicts ultimate victor. Once the scenario mix is exhausted players can create their own with the 'Warplan' & 'Warpaint' programs. *Available on 3.5" FD only.* **IBM - $45.00**

BATTLES OF THE U.S. CIVIL WAR Vol 3 — **SSG**
This last program of the Civil War series features the final savage years of the Confederacy. DIPLOMACY — **AH**
It's back! Re-released in a smaller box, this excellent computer game is a must have for all Diplomacy players. You can play the game using the computer only, and can have up to 7 computer players, though the computer players do not ever make alliances, so are not much of a challenge. But should you only have 3 or 4 human players, the computer players make great cannon fodder. One of the greatest attractions of the game is that you can use it to resolve the turns when playing the board game. Just type in everyone's orders, end the turn, and it will instantly work out who goes where, and if you've rigged up a printer, it will even print out the results for you, listing centres gained and lost, and asking which pieces to lose when centres are lost. Graphics are extremely crisp CGA. *Requires: either 5.25" or 3.5" FDD, and CGA or better graphics card.* **$50.00**

GOLD OF THE AMERICAS — **SSG**
Covers the violent evolution of the American continent - from discovery by Colombus to the War of Independence. England, France, Spain and Portugal all squabble and compete over the new lands. Accommodates up to four players, or can be solitaire. The historical game or a random game can be played. Players will need to preside over matters of naval trade or aggression, discovery of the new lands, colonisation of those lands, development of colonies, raids upon or conquering enemy colonies, and so on. If you demand too much of your colonies, their loyalty will reduce, and they will eventually rebel - and cause the American Revolution in effect. A good, playable game. *Requires 3.5" FDD.* **IBM - $45.00** **AMIGA - $45.00**

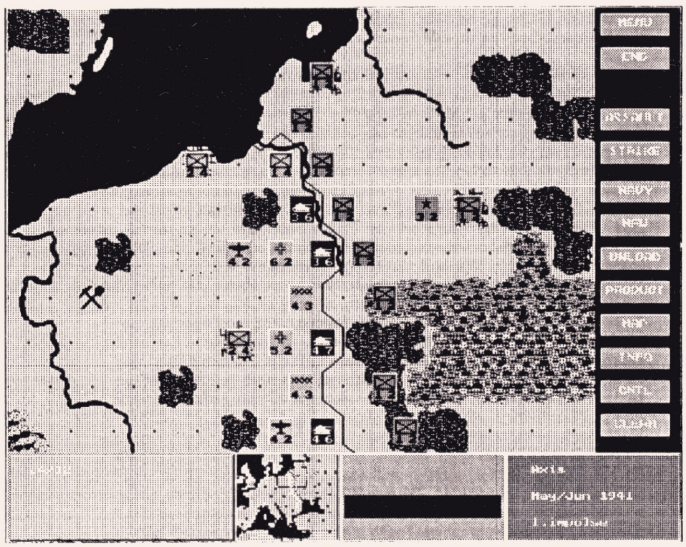
THE GREAT WAR: 1914-1918 — **SSI**
This looks set to be a *Perfect General* version of World War One, with hex based top-down views of all the tanks, guns, and infantry. It allows you to fight WW1 through an escalating series of battles that introduce new units, terrain, and tactics, re-creating the flavor and scope of that terrible conflict. For one or two players, it presents 30 scenarios that allow strategy enthusiasts to commandall the major weaponry used in that era, including infantry, artillery, cavalry, tanks such as the Renault, ships including U-Boats, and planes such as the Sopwith Camel. Interspaced with these combat scenarios are wonderful cinematics, still photos, and text that makes this game an exciting history lesson of World War One. *Requires: IBM 386SX or better, hard disk, 1.44" meg 3.5" FDD, VGA.* **IBM - $90.00**

WORLD WAR TWO

CARRIERS AT WAR — **SSG**
Contains 5 decisive naval engagements - Midway, East Solomons, Philipine Sea, Santa Cruz, & Coral Sea. A design package allows the creation of hypothetical scenarios. The menu has 63 aircraft types, 3,000,000 square miles of ocean, 5 major ship classes, and more - enough to create any air & naval operation of WWII! Although the graphics aren't going to knock you out, this is a comprehensive military study. The brand new IBM version contains stunning graphics and combat reports. *Requires: 1.2 meg 5.25" or 1.44 meg 3.5" FDD, hard disk, EGA or VGA.* **IBM - $70.00**

CARRIERS AT WAR CONSTRUCTION KIT — **SSG**
Contains 4 color maps and a thick 336 l page rulebook, that allows from the smallest variation to an existing battle or the complete design of an original carrier battle scenario. You can build ships and planes, organise them into squadrons and task groups, draft a map and position airbases, coast watchers, etc. Also includes three brand new scenarios: Wake Island, Guadalcanal, and Tarawa. You also have the ability to customize computer artificial intelligence. The huge appendix features the stats on every US and Japanese plane & ship. *Requires: 1.2 meg 5.25" or 1.44 meg 3.5" FDD, hard disk, EGA or VGA, 386 or better, 2 Mb RAM.* **IBM - $70.00**

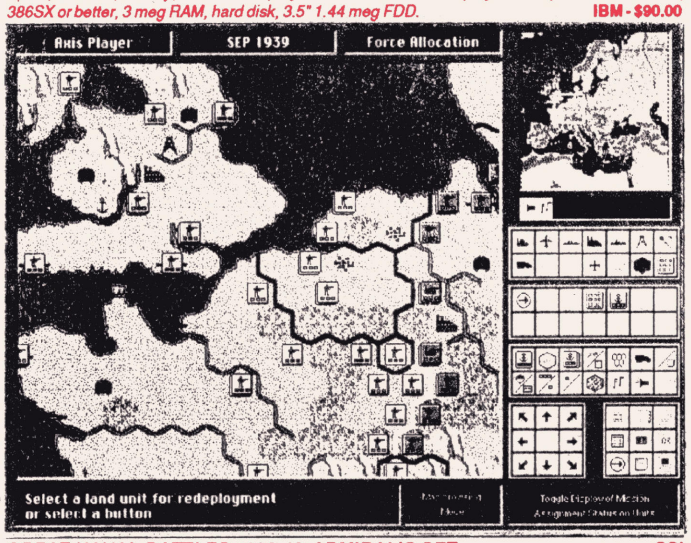
CLASH OF STEEL — **SSI**
An excellent and playable game of the entire World War Two European Theatre, from the invasion of Poland in Sept'39 to June'45. The game is for one or two players, with the Allied player looking after the Western allies and Russia. There is an option for either the western Allies, or Russia, or Germany, to be put under computer control. Which I thought was great, as I wanted to play Russia only. There are six scenarios, or the entire campaign, which takes 60-80 hours. The graphics are stunningly clear VGA, with all unit's looking exactly like the pieces in a board wargame, rated for strength and movement. The strength points go down according to step losses, and the movement points reduce as you move the unit. The units are army or corps sized, and include infantry, tank, paratroopers, engineers, air, naval, and headquarters, etc. There are a random number of impulses each turn, tending to be longer during summer, shorter in winter. Levels of play include beginner, intermediate and advanced. Naval is broken into spheres of operation, much like in the boardgame *War at Sea*. Amphibious operations, strategic bombing, U-Boat warfare, are all included. Another pleasing aspect is *Research*, where there are ten types of technology that you can develop, including AA-Radar, ASW-Sonar, jet-fighters, AT-Guns, heavy tanks, etc. Politics are included, allowing you to flex a limited resource of political muscle to subvert nations into your camp. When producing units, a unit destroyed in combat can be rebuilt at half cost, and all units will appear from 2 to 5 turns after production begins, depending upon unit type. This forces you to plan ahead. *Requires: 386 or better, 1.44 meg 3.5" FDD, 2 meg RAM, hard disk, VGA.* **IBM - $90.00**



EMPIRE DELUXE — **NEW**
This game is so popular amongst many gaming circles, that I know of a confirmed MAC addict bought an IBM-PC just to play this game! The game mechanics are simple, allowing players to resolve conflicts from WW1 up to the present day, with troop types including infantry, armor, fighters, bombers, troop transports, destroyers, subs, cruisers, battleships, and carriers. There can be from 1 to 6 computer or human players - and here's the greatest appeal of the game: you can play it with friends using modem, network, or null modem. The game features multiple zoom settings, various levels of play, and a simple to use scenario editor where you can determine anything from the size of the world to the number of players, etc. One of the scenarios provided is an absolute monster game of WW2 - with the *entire* world! *Requires: 286 or better, hard disk, 1.44 meg 3.5" FDD, EGA, VGA, or SVGA.* **IBM - $85.00**

FIRE BRIGADE — **PAN**
The struggle for Kiev in 1943 was one of the most decisive and mobile battles of the entire Eastern Campaign. The assault by the elite 3rd Guards Tank Army threatened to split the entire German Front and isolate Army Group South. Black's hardened 48th Panzer Korps (the infamous Fire Brigade) was committed for a counter attack in a desperate bid to gain the initiative. This is an award winning Australian game that features great graphics, variable skill levels, and a tutor program. **IBM - $44.00** **AMIGA - $45.00** **MAC - $45.00**

HIGH COMMAND — **360**
A detailed simulation of World War Two in Europe. You exercise complete control of the sea, land, and air forces of your alliance. You are in charge of your resources, and have to allocate them to the military, political, and economic operations. The economy also needs to be controlled, including production, which includes shipbuilding, oil, minerals, air bases; research, which includes the economy, rockets, atomic bomb; development, and foreign aid. The game features stunning SVGA graphics. Game options include the effects of the Pacific theatre, a neutral Russia, weather, Spain, Sweden, Turkey, etc. Can be played solitaire or with two players. *Requires: 512k SVGA, 386SX or better, 3 meg RAM, hard disk, 3.5" 1.44 meg FDD.* **IBM - $90.00**



GREAT NAVAL BATTLES 1939-43 *ADMIRAL'S SET* — **SSI**
This Admiral's Set contains the original game of GNBs as well as all three add-on disks. This game

is the most stunning WW2 naval combat simulation ever made. You can be the captain of WW2 German or British battleships and cruisers as you do real time battle against the enemy ships. You can also play from a fleet view of a battle, and can be given a grand admiral view, allowing you to control your entire nation's fleet. The game comes with many battle scenarios such as the hunt for the Bismark, mini-campaigns, and contains the entire 1939-43 campaign. Replays are possible, and the game contains stunning sound and graphics. The first add-on is SUPER SHIPS, which includes the German "H" Class BB, "P" Class pocket BB, "M" Class CL, & "Z" DD. British ships include Vanguard BB, Lion BB, Bellona CL, Swiftsure CL, & Battle DD. 10 scenarios, and 3 campaigns, the last of which pits the British and German fleets against each other on nearly equal terms. 2nd add-on is AMERICA IN THE ATLANTIC, with all the American ships that could be found in the Atlantic during WW2, presented in a series of scenarios, plus a campaign. 3rd add-on is SCENARIO BUILDER, which allows you to create an unlimited number of North Atlantic battles using all the ships in GNBNA and expansions. You can also modify existing scenarios, and there are game updates to the game system. And another great bonus is a Captain's Campaign, where you start as a destroyer captain, and have to try to climb your way upto Task Force Commander. *Requires: VGA, hard disk, 386 or better, & 1.44 meg 3.5" FDD.* **IBM - $100.00**

HALLS OF MONTEZUMA — SSG

From the capture of Mexico city in 1848, through two World Wars, Korea, and Vietnam, the U.S. Marine Corps has a combat record second to none. This is a multi-scenario computer history of the Marine Corps' most testing battles. The mechanics are based on BATTLEFRONT system, and includes WARPLAN game design option, and WARPAINT, which gives complete graphic control over the icons. Good detail. *IBM Requires 3.5" FDD.* **AMIGA - $45.00** **IBM - $45.00**

PACIFIC WAR — SSI

This new game is the third in the SECOND FRONT series by Gary Grisby, and is absolutely stunning. It covers the entire Pacific War from 1941 Pearl Harbor to August 1945, and includes all nationalities involved, including Australia, India, USA, Japan, China, Indonesia, New Zealand, etc. The game features superb graphics for all planes and ships, with different paint schemes for planes according to nationality and theatre. Every single ship that saw service in the theatre is included: CVs, CVLs, CVEs, BBs, CAs, CLs, DDs, DEs, troop transports, merchantmen, oilers, patrol boats, etc. You also command every single plane, land based and carrier based, and all land units, from engineer battalions and up. Game mechanics are somewhat different to SECOND FRONT, so players should expect to be a little confused at first - but once you get the hang of it, you will soon consider this the finest computer wargame ever. The complete game will take you around 40 - 80 hours, and you must plan many turns ahead, controlling supplies, airgroups, invasions, etc. The computer can control any of your own forces, or you can take complete control. There are 5 scenarios + campaign game, historical and random setup, kamikazes, atom bombs, etc. I rated it 11 out of 10 - it's that good! One tip - when playing, always press the "X" key, as this will change the map flags into easy to follow symbols. For those interested, please send us one blank high density disk & $3.00 postage, and we'll send you two unofficial SSI updates on this game, taken from a U.S. bulletin board. *Requires: 286 or better, 1.44 MB 3.5" FDD, hard disk, EGA or VGA, 640K.* **Note New Price IBM - $79.00**

ROMMEL: BATTLES FOR NORTH AFRICA — SSG

The Italian army has been routed out of Egypt: the Germans respond by dispatching a small, albeit elite force, to try and stem the Allied advance. WAR IN RUSSIA - By Gary Grisby — SSI

This is without doubt the computer *wargame* of the year. Gary Grisby has totally redone *SECOND FRONT*, using many of the excellent aspects of *PACIFIC WAR*. It is for one to two players, with eight historical scenarios, one hypothetical scenario, and four campaigns. The complete campaign takes up to around 70 hours. As before, units are German Corps and Russian Armies, but stacking limits have rectified the loop-hole of Second Front where you could place three Panzer Divisions and five infantry Divisions in one Corps. Tank & mechanised corps, Panzer and Pz Grenadier Divisions, have 3 stacking points, independent sub-units have 0 stacking points, and all other units, such as infantry divisions, have 1 stacking point. A German Panzer Corp, and a Soviet Tank or Shock Army, can take 9 stacking points. You can put *more* than 9 SPs if you desire, but the unit will lose readiness. eg, if there are 15 Sps, you will lose 75% of the unit's readiness. A Soviet infantry army takes 5 SPs, and an Axis infantry corps takes 3. If this unit has eight infantry divisions, it will now have a SP of 8, and suffer 50% readiness loss. Another bug fixed is that you can no longer transfer divisions and sub-units from any unit to any other unit. Firstly, a corps or army must be 50% or more readiness or you cannot transfer *anything* in or out of it. Secondly, the maximum distance units can transfer is the worst supply level of the two units. eg, SL is 3, so max no. of hexes to be transfered is 3 hexes. *Another* major loop-hole of Second Front was that any unit could move any distance at all on the map. No longer! Now in march mode, infantry units can move up to 5 hexes, and mechanised up to 10. Combat plotting is till the same as before, with infantry moving a max of 2 hexes, and mechanised 5. But you will lose 10% readiness per hex, so armored units will no longer want to move 4 hexes and then make an attack.

One of the greatest new features of the game are *Operation Points*, as found in Pacific War. Each HQ receives an allotment of OPs each turn, based on your resources. That HQ can then move units under its command according to the OPs it has. This can severly hamstring your defense if you lose HQs or have a lot of actions you wish to perform. Crucial units will end up not being moved simply because you had to spend the points on other units even more important.

Other new features including stunning graphics on *all* units, just like in Pacific War. Now when you call up a Panzer Division to examine it, and when there is a battle, you will see full color side views of each tank type, gun, armored car, and aircraft. The game even includes a scenario editor, allowing you to change pretty much any aspect of the game. *Requires: 386 or better, EGA or VGA, 3.5" 1.44 meg FDD, hard disk, & 640K RAM.* **IBM - $99.00**

HARPOON SIGNATURE EDITION 360

With this modern naval combat simulation, World War III begins, and the NATO Task Force in the GIUK Gap is ordered to hunt down and destroy their Soviet counterpart. The paramount objective is to neutralise the enemy as cheaply as possible: and in this age of precision armaments, elaborate electronics & very fast delivery systems, deft leadership is a vital prerequisite. Every asset, no matter how formidable, is vulnerable to enemy fire - thus prudent tactics & shrewd manoeuvres are the keys to victory. Over 100 contemporary vessels are included, of ships, submarines, and aircraft, each comprehensively described in technical specifications. This is based on GDW's miniatures rules, and retains it's sense of awesome power and predacious cunning, but is thankfully unburdened by prolific book keeping! Features 12 scenarios. This pack is certainly value for money. Included in the box are the standard Harpoon game (as described above), the Harpoon Battlesets # 2, #3, #4 (as explained below), the Harpoon Scenario Editor (also explained below). This pack is worth way over $109.00. *IBM requires EGA or VGA, 1.44 MB 3.5" FDD, Hard disk.*

REACH FOR THE STARS SSG

This is one of the best computer games ever made, and certainly the delight of "number crunchers". It contains two games, Standard and Advanced, which are both very different. It can be played solitaire against 3 computer opponents, or with up to 4 human players, as each player builds up his home world, developing Navigational, Industrial, and Ship Technology, and building up the world's industrial, social and economic levels. This allows population to increase, and colonists can then be sent out to colonise newly discovered worlds. There are 53 star systems, each with up to three planets, which could be hostile or ready to colonise. But the other three players will be attempting the same, and only one can win - so players first build up an industrial base, and then use this to manufacture multiple battlefleets and storm troopers - ready to conquer the galaxy! The game is both an economic and military challenge. Have you ever played in a Play By Mail game in which you wished the turn around was five minutes and not two weeks? Well, that's what this game is like - PBM heaven. This game can be played PBM. Each player does his turn, ends his turn and enters the next players turn, saves, and posts it to the next player. Simply make all battles be to the death. **AMIGA - $45** **IBM - $45**

SPACE HULK ELA

It's here! The game of the year. The year is 2 247 989 in the 41st Millenium. Join the Space Marine Terminators from the Dark Angels Chapter of the Legiones Astartes as they battle in derelict space craft infested with hordes of vile Genestealers. Players use the top-down tactical map to form battle plans and give orders. You command 5 - 10 terminators in "freeze time", which means real time play with the option of stopping play to give new orders. But freeze time is limited, just like command points in normal Space Hulk. Real-time combat is then viewed 3-D, where you can control any one of your Terminators, as you explore darkened corridors and rooms. Overwatch is the default command for your Terminators, and other orders include opening/closing doors, weapons fire, movement, etc. Weapons include lightning claws, power gloves, chain fists, Thunder Hammer, storm bolters, assault cannons, heavy flamers, and power swords. There are 51 missions, including 5 basic tutorial missions and 9 advanced tutorial missions, and 37 real missions, some of which are in a campaign. Graphics are absolutely stunning, and you get to fight in several different types of space hulks, as well as underground, and includes sparking electric cables, broken pipes hissing steam, Genestealers hiding in walls, etc. The game interface is very simple to use, being mostly point-and-click. You can switch between any of the Terminators using function keys. Sound is also stunning, and even works on your PC internal speaker, featuring the Marines egging each other on, foot-steps on metal grating, Genestealers screaming in the distance, motion detectors announcing movement of blips, etc. *IBM requires 386 or greater, hard drive, 1.44 MB 3.5" FDD, and VGA.* **AMIGA - $80.00** **IBM - $80.00**

SPACEWARD HO! NEW

At last! Another magnificent space conquest game! The game has a slight comic approach (cowboys in space), but apart from that, is the new REACH FOR THE STARS, with a much, much friendlier interface. You can have up to 20 !! players, being a mixture of human and/or computer. The game can even be played with several players via a network. The galaxy size can be from small (with around 40 stars) to humongous - with around 169 to 300 stars! Galaxies can be round, spiral, random, circle, or grid, and are always different. They can be dense or sparse in resources. There five technologies, with (I believe) unlimited levels: range, speed, weapons, shields, & mini (miniaturization). With these you can design all of your own ships, which are fighters (warships), scouts, colony ships, and satellites (static defense stations). There are two types of planets: colonisable, which require terraforming, mining, and defending; and resource, which require mining & then abandoning. Resources are metal, & as you build more & more ships, you'll run out of metal. Which is where mini tech comes in: once you've got higher mini levels, you'll have to scrap old metal-hungry ships, & build new ones that use less metal. All economic & technological aspects of the game are controlled by bar graphs, using point and click. Absolutely brilliant, with great graphics, easy to follow menus, and dozens upon dozens of hours playing time. (For a humongous game with hundreds of stars, the save game file can be over 800,000 bytes!) The computer even learns from what you do. It will copy your player names & ship names, so in multiplayer games, you will not know who's who! Requires: EGA or VGA, mouse, hard disk, 1.2 MB 5.25" or 1.44 MB 3.5" FDD.
Now available on both DOS and Windows - $90.00

STRIKE COMMANDER ORI

This game is absolutely nothing like WING COMMANDER. If you want a fast action shoot'em up, then don't buy this game. This game is like a *real* flight simulator - that is, it's flippin' hard to hit anything at all - a plane or even a ground target. Taking off is easy, and though landing is not, the computer can always auto land you if desired. But everything else takes lots and lots of practise, even trying to do a tight 180 degrees. Graphics are, however, stunning. A game pop-up option panel lets you play with all the various levels of graphics, and you can end up with entire cities, with roads, fields, buildings, etc; and the aircraft graphics are just as good. Definately a game for the real flight sim buffs. *Requires 386 or higher, DOS 5.0, 4 MB RAM, VGA, 27-33 megs on hard disk, 1.44 MB 3.5" FDD & does not support disk compression utilities.* **IBM - $99.00**

SYNDICATE ELA

A corporate syndicate take over of the world, set in a cyberpunk dark future, using a team of cyborg soldiers. You gain both technology and weapons throughout the game, which costs money. Money comes from taxing conquered areas. You are competing against 7 other syndicates. Your cyborgs are either recruited during missions, or picked up and given a full body conversions after being run over by a car (on purpose of course!) There are fifty or so missions, using superb partial down-view 3-D graphics. Each mission requires your cyborg team to achieve something that will further your attempt to rule the world. Missions include corporate extractions to steal important people from rival syndicates, assassinations of political and military targets, retrieval of required items, etc. Graphics used to contect various scenes together, such as the intro and mission debriefings, are breathtaking. Please note that this is a very *dark* game. *Requires: 512K SVGA, 386SX or better, 4 meg RAM, mouse, hard disk, 3.5" 1.44 meg FDD.* **IBM - $90.00 AMIGA - $80.00**

WING COMMANDER ORI

This game is without doubt the best computer game ever designed, both with unequalled graphics and playability. The game is a flight simulator set in the year 2654 AD, in which mankind is locked in a desperate war against the murderous Kilrathi aliens. The game links each flight together in a stunning campaign, and you will fly 20 missions out of a total of 40, and which 20 missions you will fly depends on how well you do. With each flight, you have the option of speaking with other pilots to learn tactics and hints, a briefing where you are told your mission, and then follows a stunning sequence as pilots scramble to their fighters, to be catapulted into space (even better graphics than BATTLESTAR GALACTICA!) There are four different fighters to fly, each with their own four cockpit views, different weapon loads, shields, armor, and manoeuvrability. The game is very simple to learn, with a tutorial provided. You will be given missions to escort and protect friendly capital ships - from slow, ponderous tankers to 700 meter long carriers, to fighting deadly dog fights against five enemy fighter types (and watch those Jalthi, with 6 guns they are murderous!), and you will also be given missions to hunt down and destroy enemy destroyers, tankers, and carriers. The game is simple to learn, difficult to master, and has no boring moments, an autopilot removes any waiting during travelling. *IBM requires 1.44 MB 3.5" FDD, hard disk, VGA, 286 or better.* **Note New Cheaper Prices** **IBM - $50.00** **AMIGA - $50.00**

WING COMMANDER # 1 DELUXE ORI

This contains WING COMMANDER # 1, and SECRET MISSIONS 1 and 2. SM # 1 is the first sequel to WING COMMANDER, and players can transfer their character to this mission. The Kilrathi have designed a new super-weapon, and have destroyed an entire colony before fleeing into their space. But your carrier has been given the task of hunting this ship down and getting revenge. There are 16 new missions linked in a campaign, but the enemy are thick and fast - over 250 enemy fighters and capital ships to destroy! Has four new ship types, plus a mission selector for WING COMMANDER. SM # 2 is the second sequel to Wing Command, and the hardest yet. A newly joined ally of the Confederation is beset by hundreds of Kilrathi ships, and when one enemy carrier & it's fighters defects, you are sent on a deadly undercover mission to save them. You will fly an enemy fighter (with stunning graphics!), and battle 16 missions before you can save the new allies. *Requires 1.2 MB 5.25" or 1.44 MB 3.5" FDD, VGA & hard disk* **IBM - $80.00**

WING COMMANDER II ORI

The best game has just got better! This is a sci-fi space ship simulator, with over thirty different missions to fly, each mission being linked together with character interaction and storyline, with graphics so stunning you will think you are at the movies! The year is 2664, ten years since the TIGERS CLAW was destroyed by Kilrathi stealth fighters, and you, the finest pilot of the Confederation, were framed by human traitors as being responsible for the disaster, before being court martialled and sent to a backwater outpost. But after ten years of boredom, the war suddenly approaches your sector, and you are thrown into combat once again. You get to fly five new fighters, including a jump-capable fighter-bomber. Larger fighters now have rear or flank turrets, which you can also control, and capital ships can now be taken out with one or two hits by new killer torpedoes. You will be stationed on a space station, planetside, and on a new space carrier, as you battle against murderous Kilrathi aliens - but watch your back, there are human traitors aboard the carrier, and they are picking off your fellow pilots one by one! New graphics for take-off and landing sequences will leave you stunned, as will improved graphics following character interaction as the thirty mission story continues. You will get to converse with pilots, officers, repair crews, renegade Kilrathi, and so on. The new Kilrathi fighters and ships are more deadly than ever, and your mettle will be put to the test. Any friendly wingmen can eject from destroyed fighters, and if you fly the two heaviest fighters, you can retrieve these pilots with your rear tractor beam. (The graphics of ejected wingmen spinning helplessly through space while sitting in their chairs is amazing.) The game takes up 11 to 15 meg on the hard disk! Requires: hard disk, 1.2 MB 5.25" or 1.44 MB 3.5" FDD, 286 or better, and VGA.
IBM - $80.00

WING COMMANDER ACADEMY ORI

This cute little game is a mission builder for Wing Commander II. This is very easy to use, and allows you to create an unlimited number of missions. You can select the fighter you fly from seven possibles, and can have one wingman (four are provided, including a new green pilot you need to babysit). At each of the four nav points you can place up to one mine or asteroid field, and up to eight enemy fighters or capital ships. There are two new fighters - a new, fast Kilrathi medium - which you are allowed to fly; and a beautiful new *Wraith* heavy fighter, which does 600kph, has new Reaper cannons, and a new leech missile. This new missile is fantastic. I designed a mission going up against a Kilrathi destroyer with phase shields, popped a leech into it and slammed on the breaks to come to a dead stop. The leech drained all shield and weapons power from the destroyer for ten seconds, so I blew the stuffing out of it. When it recovered I afterburned out of there, turned around, popped another leech into it, and then finished it off. I also designed a mission using the Morningstar against the destroyer with phase shields. I fired the nuke at the destroyer from about 2.5 km, and whammo, up went the destroyer and my front shield and armor. Much better than using those damn torpedoes! There is also a randomizer option for DYO missions, and a *gauntlet option,* where you choose any ship you want to fly, and then go up against 15 levels of three waves of fighters, each with 1 to 7 Kilrathi piloted ships. I only tried a few times - in the Ferret, of course. I know it's the lightest fighter they have, but those gattling mass drivers are without compare. I got up to Level 11 - that's over 30 !!! waves. My score was around 92,000, and it took over an hour. Please note that if you are playing on a 486, turn off your turbo.
Requires: 386 or better, VGA, hard disk, 2 meg RAM, 1.44 MB 3.5" FDD, & hard disk. **IBM - $80.00**

WING COMMANDER PRIVATEER — ORI

Now *this* game is going to be big. Set in the Wing Commander universe, you are a privateer, playing the part of a pirate, merchant, or mercenary, out to make a quick buck in the face of the Kilrathi-Terran conflict. The game features a complete universe, with nearly 60 bases and 90 solar systems to visit. Adventure, trade, and exploration are limitless, even once the main game is completed. You select your own ship, and can modify it from profits you make from trading. You can pilot a fighter, tug, merchant ship, or a scout ship you inherited from your grandfather. You can even make your own alliances and profession, whether to be a pirate, merchant, or mercenary. Battles are no longer just to blow up the enemy - everyone wants to nab everyone else's cargo! You can accept an infinite variety of missions from Mission Computers, Mercenary Guilds, and Merchants Guilds, or follow deals set up by fixers. *Requires 386 or better, 2 MB RAM, VGA, 1.44 MB 3.5" FDD, hard disk.* **See page 37 for full write up** Available Now **IBM - $99.00**

ULTRABOTS — ELA

Okay mech-heads - this one's for you. This game is set in the future, when a race of aliens invades Earth, nukes the stuffing out of it, and then sets up automated bases and factories, with automated mecha defending them. But humans have captured and copied the mechs, and the battle's on. Graphics and sound are both without compare. You get to pilot three mechs, each with it's own stunning cockpit. You pilot lightly armed but fast scouts, powerful warrior mechs, and scorpion-style net builders, including tactical nukes. All mechs receive their power from a grid of "net" stations, and to extend this net you have to lay more stations, which is quite easy. Any mechs can be put on auto, with a whole range of commands. World details are magnificient, ranging from dawns to golden sunsets. There are training missions and a campaign in which you fight over the whole world. Each mission usually gives you around 6 to 9 mechs, which can be repaired if necessary. The enemy usually has from 10 to 12. To win you have to take out the enemy base, and as this is always beyond your net-grid, you either have to build a net-relay up to their base, or keep sending mechs back to your grid to recharge their batteries. Good fun! *Requires 386 or better, 1 MB RAM, VGA, mouse, hard disk, 1.44 MB 3.5" FDD.* **IBM - $60.00**

FANTASY

FIRE KING — SSG

A lone hero or heroine goes on a quest for adventure, searching the land's darkest nooks and cranies for treasure and evil foes. Features arcade style action with 3-D graphics. Players meander around the Fire King's Realm, looking at the wondrous sights, dealing out rough justice to various creepy crawlies, and pocketing anything they find of value! Action a-plenty for those brave enough to venture from the castle's comforts. *Requires 3.5" FDD.* **IBM - $45.00**

POPULOUS II — BUL

For all you people who've been delighted by Populous, you'll love this carry on. 32 Greek mythical gods would like to challenge you, and each has his or her own skills and weapons. Graphics are greatly improved, & you will be delighted as your little people build all forms of Greek architecture. There are apparently 1,000 worlds to battle in, & you don't progress up to the next Greek deity until you've beaten the previous one - Zeus is the last and is the "umpire" of all games. If you do well, he'll reward you, if not, he'll be disappointed. The game involves you & the computer player each starting with a small number of people. You have to guide your own in building houses, villas, and cities. The better you build, the quicker they populate. The more people you have, the more divine power you have, and then you can inflict divine disasters against the enemy. (The world is too small for two deities, and one will have to leave...) Very, cute graphics. (You should see the vegetable head people!) Requires: 1.2 MB 5.25" or 1.44 MB 3.5" FDD, hard disk, VGA.
Note Special Prices **AMIGA - $40.00** **IBM - $40.00**

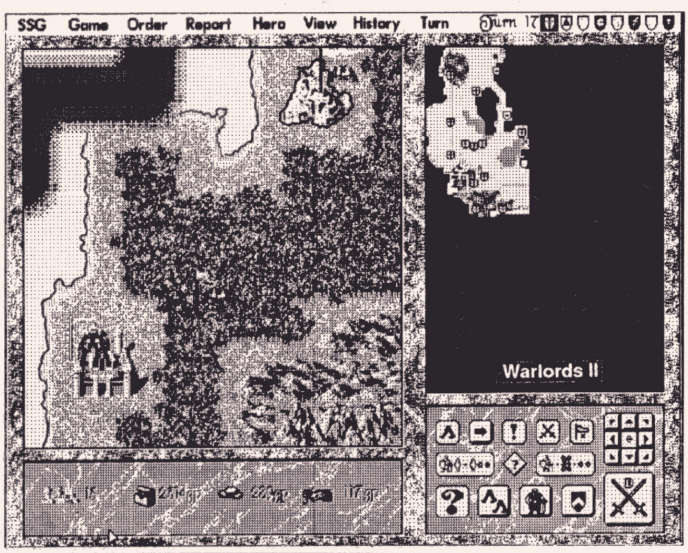
WARLORDS — SSG

1 to 8 players can participate in this large strategic fantasy campaign. Set in the medieval-fantasy world of Illuria, a fragile peace treaty has expired and after quickly dispensing with any pretence towards peaceful negotiations, all eight nations declare war on each other in a race to gain supreme power. The mechanics are simple, and include diplomatic ventures, economic restraints, production of military units and strongholds, and exploring for magical talismans or allies, such as dragons, ghosts, wizards, etc. There are 80 cities to conquer, 10 terrain types, 16 troop types and races, and terrain-racial combat modifiers. "Treat your defeated foes with the contempt they deserve - and off with their heads!" says the blurg on the box, which well sums up the friendly atmosphere. (We have been asked by customers to add a warning to this game - it is extremely addictive!)
Note: the IBM version is an improved version. **IBM - $50.00** **AMIGA - $50.00** **MAC - $50.00**



WARLORDS II — SSG

The long awaited sequel to *Warlords* is here - and it is greatly improved. It is for 1 - 8 players, any of which can be computer controlled. Computer intelligence is good, with levels being knight, lord, or warlord. An amusing option when playing against computer opponents is *I am the greatest*, which makes them all attack you all-out from the first turn. One of the greatest attractions of this new version is **random maps** - an unlimited number of them. You can even choose the percentages of woods, hills, water, etc. One brilliant quick-start option allocates all of the cities to the eight players, so you do not need to rush about exploring and gathering an industrial base - just produce armies and start kicking butt straight away! There are *heaps* of new unit types, such as giant spiders, scouts, wolf riders, pikemen, elephants, etc. Cities that can only produce one or two troop types, can invest gold in buying the ability to produce other troop types of your choice. Heroes can still romp around the map looking for talismans and allies (and unwittingly trip over monsters who are trying to stop them!)

Another great attaction of this game is that it contains **diplomacy** - even against the computer players. You can be in one of three diplomatic states with all of your opponents: allied, where you *should not* attack his units or cities; neutral, you can attack his units but *should not* attack his cities; and hostile, where you can attack freely cities or armies. In the diplomatic action screen you can change the way you wish to deal with another player, and it is in your advantage to declare war on someone first and attack him second. If you backstab him, all the computer players will lower their ratings of you and if you are rated the lowest, they will all declare war on *you*. *Requires: IBM 386SX or better, 3.5" 1.44 meg FDD, hard disk, VGA, 2 meg RAM.* **IBM - $75.00**

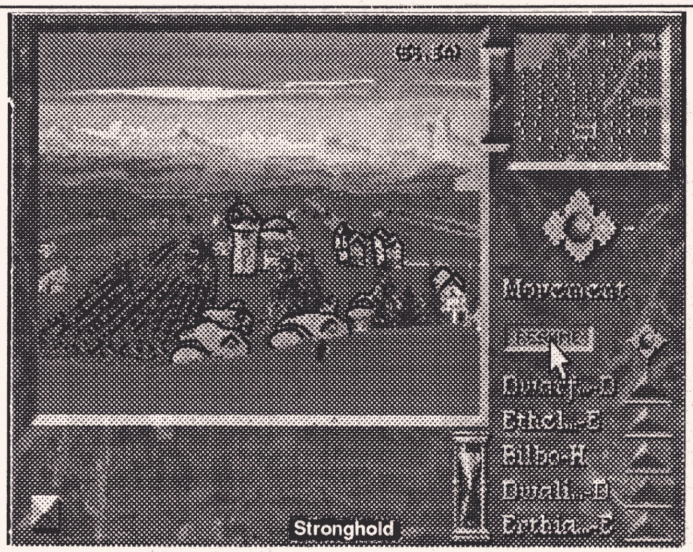
STRONGHOLD Kindgom Simulator — SSI

This is an extremely mesmerising game. It is basically a cross between *Simcity* and *Populous*. You start the game with yourself as baronand with four party characters. Each of the five characters then starts to build a manor, which can grow almost infinitely in size and quality. The baron first builds a castle, and the party members build keeps. Your five characters can also be selected from the races/classes of elf, dwarf, fighter, thief, cleric, or halfling. Each has its own benefits. The elves cultivate trees the best, producing more income and produce than any other character class. The dwarves are best are mining rock resources; fighters are the best in combat. But the halflings - they are the best. They excel at farming, and are almost as good as the elves in tending trees and the dwarves in mining. Basically, each of your five characters will produce, or recruit, off-spring, and these will spread out from the original castle and keeps. Once they are in a plot of land that has no constructions, providing you have money in the bank, you can start to build something in that plot, whether farms, houses, guild halls, money vaults, etc. There are over two dozen basic building types that can be built, and each class has it's own building types as well. Most buildings or farms, woods, etc, can be upgraded several times, so that in the end what began as a wood ends up a profitable orchad. Graphics are also stunning, as you are given a 3-D view of the whole world, regardless of where you stand. Once your empire gets rather big, you can see farms and houses stretching away until they are too small to distinguish. The game is also a combat simulator, where you can both defend your home empires from attack from hordes of AD&D monsters and villains, or you can go hunting down enemy strongholds. I found the economics so engrossing that I did not even worry about conquering the world with military might. *Requires: 386 or better, VGA, 2 meg RAM, 3.5" 1.44 meg FDD, hard disk, mouse.* **IBM - $90.00**



UNLIMITED ADVENTURES **SSI**

You've probably noticed that there are not many AD&D titles left - but not to worry! This game is in fact an AD&D game builder, or construction set! You can build maps with an easy to use grid screen and link them with teleporters, doorways, and stairwells. Choose characters from 112 monsters and NPCs. Design dungeons of your dreams. There is a complete scenario included, which can even be edited. You can use 200 classic art images included, digitised pictures from AD&D, import original art files, combat uses the strategic overhead phased system, and there is easy backup. *Requires 286 or better, VGA, hard disk, 1.44 MB 3.5" FDD.* **$90.00**

A-TRAIN **MAX**

The people who brought us SIMCITY have now brought us an equally gripping rail building game. You start the game with an open space and a small bank loan, and build yourself an empire. Detailed reports track your business holdings and urban development. There are 19 different locomotives to choose from 3 continents, and you can diversify your portfolio by buying and selling up to 24 different OTC stocks. But be careful, because if the stocks crash, you will too. There are six different scenarios, you can build high-rise offices, department stores, hotels, golf courses, amusement parks, stadiums, ski resorts, etc. *Requires EGA, VGA, hard disk, 5.25" or 3.5" FDD.* **IBM - $90.00** **AMIGA - $90.00**

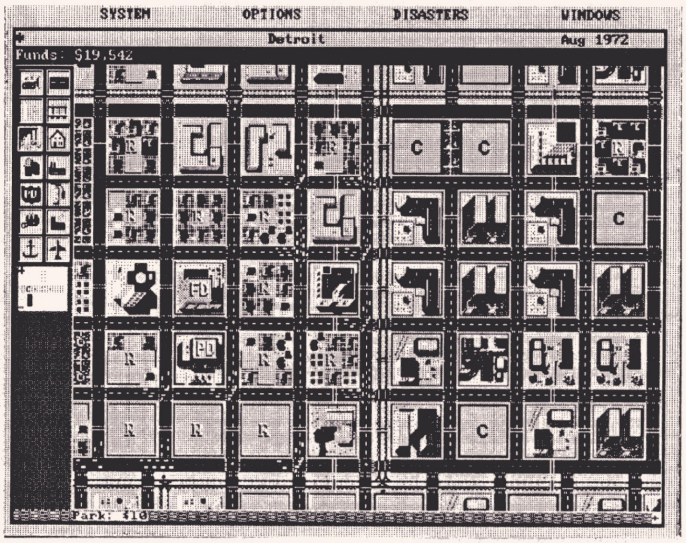
SIMCITY CLASSIC **MAX**

This is one of the most original and addictive computer games available - you are a city planner, given the task of designing a city that will grow and develop to successful proportions. There are six preset scenarios, each with a given task for you, the city planner, to resolve. But there are also dozens of blank maps to work on, including islands and river sites, upon which you can build a city from scratch. You control where to place roads, highways, and railways, and residential, commercial, industrial areas, plus airports, harbours, fire stations, police stations, sports stadiums, etc. The goal of the game is to please the population, in which case they will stay in your city, and others will migrate, but the people are fussy, and will complain about traffic congestion, pollution, housing costs, taxation levels, unemployment, crime, and so on. You can control each of these factors by building better road systems, keeping industry away from residential areas, lower taxes, and so on. And the challenge to meet is to build a city up to 500,000 population (and I know of only one person to have reached this target!). The graphics and animation are superb, and game mechanics are all pointer controlled, and easy to use. Thoroughly recommended! **This repacked version includes the Terrain Editor,** a necessary tool to build cities up to 500,000. One of the cities provided as a scenario has $11,000,000 dollars, so you can set taxes to $0. *Requires hard disk, CGA, EGA, or VGA, 3.5" or 5.25" FDD.* **IBM - $80.00** **AMIGA - $80.00**



SIMCITY 2000 **MAX**

A completely revamped version of Simcity, with 3-D views available at three magnification levels. Specially designed for VGA, can be placed as a beginner, or with options turned on, as an expert. It adds things such as highways, tunnels, on-ramps, bus depots, parks, zoos, marinas, alternative power sources such as gas, solar, micro-wave, etc. It features 64 levels of altitude, an underground level for water, subways, variable sized zones, more city services, terrain editor, local newspaper for events, angled roads, new disasters, etc. *Requires: IBM 386 or better, 4 meg RAM, hard disk, VGA, 3.5" 1.44 meg FDD.* **Due November - $109.00**

ANIMAG

Why did we include a magazine dedicated to Animi? Because, (A) - it does have some relevance to the gaming fratenity: all those vivid, hi-tech cartoon slugfests between massive mecha combat vehicles & their young, glamorous pilots were the genesis for Robotech & Battletech. And (B) - we like alluring, doleful-eyed heroines! Each issue features extensive articles on Japanese TV and movie animation - with colour & black 'n' white sketches, stills, and diagrams. Publication regularity is fairly poor.

INTERFACE

A great little quarterly B4 publication by Prometheus Press devoted entirely to Cyberpunk 2020. This is quite worthwhile for players of any near-future RPG. Articles cover such topics as new equipment & weapons, megacorporation profiles, short fiction, alternate character classes, net programs, NPC profiles, and so forth. The standard of artwork and layout is very good, well worth a look if you play the game. Publication regularity is good, but having only four issues a year makes the wait a bit lengthy.

TGI **GUDERIAN'S BLITZKRIEG Sep 21-Dec 20 1941** ***

This game of Guderian's drive on Moscow, from Sep 21 to Dec 20, 1941, has been given rave reviews, and at the insistence of Bradley Ellis (the previous Mil Sims artist) we have got some in. This is the first in the new Operational Combat Series games, OCS, which are an in-depth series requiring the utmost use of operational resources of units, supply, and transportation. Both players find themselves confronting operational puzzles of the highest magnitute as they attempt to apply their limited resources. There are tons of supply counters, transport counters, and each unit counter is given a combat facing and a movement facing on the back. As such this is an extremely realistic game. It also features tactical surprise effects, special units, realistic blitzkriegs, 1260 superb counters (ask Brad!) which include aircraft, 6 teaching scenarios, 8 major scenarios, and many play aids. Two 22" x 34" color maps. Excellent. **$85.00**

SCIENCE FICTION

FAS **BATTLETECH 3rd Edition** **
By the 28th Century, mankind had spread civilization to hundreds of worlds, spanning hundreds of lightyears out from Earth. But then began the Succession Wars, horrible conflicts which destroyed technology and human life without precedent. By 3025 AD, war had reduced very much to attrition - great 10 meter tall war machines called BattleMechs ruled the battlefields, but once destroyed, were not easily replaced. Hence the Mechs on the field were mostly decades old, patched up time and time again, just to keep them in the field. The few factories not destroyed in the Wars turn out a pitifully small number of new mechs. Enter the world of BATTLETECH, where men & women piloting these great machines fight desperate battles over these few production facilities, neighboroughing space, and limited water reserves. The Mechs are true titans, unequalled by any prior technology, each bristling with enough weapons to destroy a modern day tank battalion, soaking up their punishment with sophisticated ferro-fibrous armor and titanium frames. This 3rd edition comes with a 56 page rulebook (updated to the BATTLETECH COMPENDIUM) that covers heat build-up, piloting skills, critical hits, physical attacks (punching, etc), movement, combat, etc. It also has 4 scenarios, details on the Successor States, Mercenary Companies, Bandit Kings, MechWarrior Families, 'Mech anatomy & Regimental organisations. STE **CAR WARS** **

A fast-playing multi-player game of automobile combat. Players spend points designing a vehicle - thickness & position of armor plating, choosing from an array of weapons (smoke-screens, caltrop dispensers, auto-cannons, oil slicker, etc), and support gear (targeting computers, bumper spikes, etc). These machines of destruction are then raced about on the road in a delirious frenzy of mindless mayhem, and harrowing havoc. Con-tains 73 colour counters & two 22"x34" arena maps. The rules cover driver skills, special maneuvers, collisions, debris, armed pedestrians, obstacles, motorbikes with sidecar weapon-pods, and campaign play. **$25.00**

GAM **DOOM OF THE ELDAR** *

Just reading the short story background info on this game was enough to motivate me to play it. And I must say that it was one of the most enjoyable boardgames I've played. The game focuses upon a huge horde of Tyrannid swarms leaping out of warpspace to attack the Eldar Craftworld Iyanden. The Tyrannids arrive in space randomly in 6 sectors. Moving one sector per turn, they then have one more sector to move before reaching the Craftworld in the centre of the map, which itself consists of 9 zones. Upon reaching the ship the Tyrannid counters are flipped over, to reveal what type of ground troops are divulged, such as Genestealers, Protoids, etc. The eldar forces are much smaller, and include a fast moving fleet (the ships can move 3 sectors), and a horde of small but powerful defenders. They have the ability to repair, produce, & limited re-inforcements. It's tough, but the eldar can win. Game components are stunning, with glossy full color double sided counters, & the most stunning mapboard I've seen. Rules are refreshingly simple, allowing you to concentrate on perfecting your tactics - for only the perfectly wielded force can win. **$45.00**

The Iyanden Craftworld - this painting plus sector lines is the actual gameboard

TAS **FEDERATION & EMPIRE (DELUXE) 3rd Edition** ***

A comprehensive campaign set in the STAR FLEET BATTLES universe - the Coalition (Klingon, Lyran & Romulan) wage total war with the Alliance (Federation, Kzinti, Hydran & Gorn) for galactic supremacy. Mechanics include cloaked movement, fleet repair docks, convoys, battle intensity, capturing ships, carrier groups, PF flotillas, neutral races, scouts, maulers, supply, provincial & planetary income, deficit spending, shipyards, ship conversions, the Klingon B10, Orion Pirates, planetary defenses, and the Tholian Web. Components include an 80 page rule/scenario book, 1512 counters (individsual ships & squadrons), plus two 19"x23" maps (1,630 light years per hex). An impressive game that incorporates brutal tactical duels, sweeping fleet maneuvers, and econo-mic strategy... but it's rather expensive! **$99.00**

GAM **HORUS HERESY** *

A gripping game of the chaos-corrupted Warmaster Horus leading a huge rebellious army which includes chaos daemons and traitor marines, to attack Earth and the Emperor. The large, colorful mounted map includes the Emperor's Palace and surrounding areas. Off-world areas include the warp the orbital areas. There are 181 double sided counters, 20 cards, colorful setup sheets, rule book which includes a complete history of this all important battle. **$45.00**

GDW **IMPERIUM 2nd Edition** **

A superb interstellar campaign wherein the massive Imperium tries to extinguish a growing rebel-lion ignited by an impudent Terra. The Imperial armada, although possessing incredible destruc-tive potential, is virtually shackled by bureaucratic officialdom, and is thus slow to gather its strength (the Imperial player must appeal for increases in military product-ion or finances, and lose Glory Points in the process!). Terra however, is an agile and fierce opponent which seeks a quick victory. The rules include world income, hyperspace jumps, suicide attacks, planetary bombard-ment, jump troops, outposts, monitors, Imperial succession repercussions, civil war, campaign play, etc. Components feature a 17"x22" mapboard (1.67 light years per hex) plus 350 counters (squadrons & divisions). **$60.00**

GLO **LEGIONS OF STEEL** *

A fast paced miniatures game of conflict in the near future. Human commandos in power armor invade an enemy base complex or spaceship, and are assaulted by hordes of killer android organ-isms, including skeletal G1 Nightmares, and the Mark 1 Assault Fiend. The game is fast moving and has a *Space Hulk* feel. Components include 19 metal miniatures (called 25mm but really around 30mm), 48 full color interlocking map templates, 86 color counters, 24 stand up doors, rulebook containing 8 scenarios, etc. For 2 players, each game 1 to 3 hours in duration. **$99.00**

STE **OGRE & G.E.V.** **

Terrific package with two great tactical games! OGRE pitts a conventional army group (infantry, heavy & missile tanks, nippy GEVs & howitzers) against a tracked cybernetic juggernaut bristling with missiles, cannons & anti-personnel guns. The Ogre's task is to trash the enemy's command post (this metalline beast just has to drive over it!), the defenders must gallantly plug away at the lumbering Ogre, gradually knocking out weapons and treads (this slows the hulking bugger down). The Ogre meanwhile selectively pulverises opponents, ignorant of the accumulating damage, grinding ever closer to the CP... G.E.V. introduces new units (light tanks, mobile howitzers & smal-ler Ogres) and allows players to selectively build army groups and beat the crap out of each other. Includes 4 scenarios, 187 counters (individual AFVs or 1 to 3 infantry squads), and two maps (1.5 kms per hex). **$25.00**

STE **OGRE MINIATURES RULES** **

In conjunction with the excellent OGRE miniatures recently released by Ral Partha, these rules are superb. Play is done without hexes, and the book is profusely illustrated and contains many color photographs. Rules include detailed yet playable movement and terrain rules, die cut tem-plates, historical timeline, Tables of Organisation including 10 Ogres, the usual conventional units & archaic armor, command posts, bridges, emplaced weapons, revetments, jamscreens, mine-fields, camoflage, etc. Point values are included for all units. Highly recommended. **$35.00**

STE **OGRE DELUXE** **

A beautifully presented deluxe edition of OGRE. Contains a full color 11" x 17" mounted map-board of a moon surface, full color two sided counters with plastic stands, and rulebook. **$50.00**

The basic movement & combat mechanics are enhanced by a detailed damage system: when a ship is hit a weapon's-effect templates is used to carve damage out of the target's armor, when a hit actually penetrates the guts of a ship a comprehensive flow-chart is used to slelectively destroy the on-board systems until something nasty & terminal happens. Further rules cover atmosheric combat, campaign play, space installations, ship construction, asteroids, and variable missile warheads. Components include 156 counters & two 21"x35" maps. **$60.00**

DISTANT FIRE Campaign of the battle for Gustaviv's Regret, with 20 scenarios. **$18.00**

FAS **CENTURION 2nd Edtion** **

The tank-to-tank version of INTERCEPTOR, this is a superb tactical combat game. When a wea-pon hits an AFV, a template is used to determine the extent of damage to the target's armor, this is then recorded on the vehicle's log, once the armor is penetrated the vital internal components begin to sustain hits, with disastrous results. Further rules cover orbital & conven-tional artillery, infantry squads, firing arcs, hull down positions, missiles, lasers, painting targets, buildings, lea-ders, variable ordinance, mines, smoke, engineering vehicles, air support, ground & space instal-lations, & vehicle construction. Components include an array of game markers, two double-sided 21"x34" maps, and 36 plastic 1/285th scale Grav Tank miniatures. **$60.00**

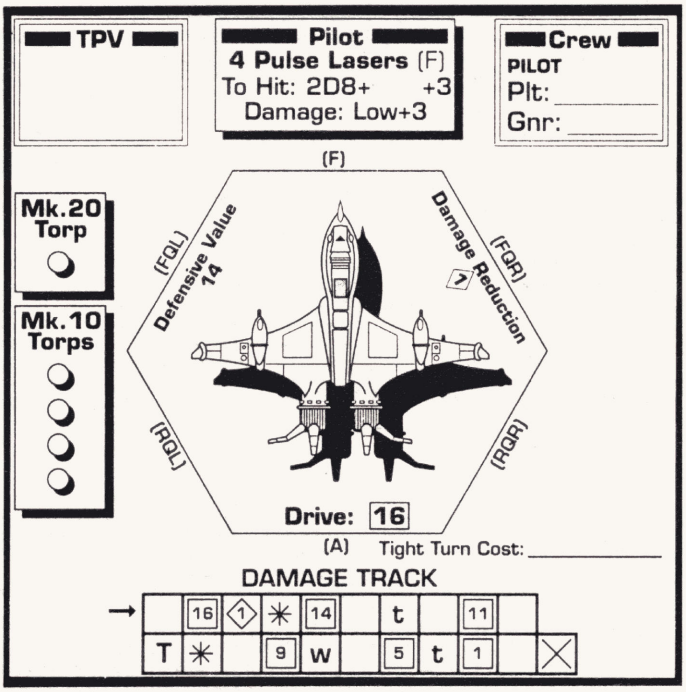
IRO **SILENT DEATH UNLEADED** **

A vast galactic empire collapses, its great navy literally beheaded by the Emperor's death. A high-tech feudal war begins as the fragments of civilisation jostle for prominence. This is an entertaining



tactical simulator of battles between proud Starfighter Wings. The fast-playing mechanics cover missiles, torpedoes, drifting, asteroids, damage control, gunnery duels, damage tracks, etc. Starship pilots & gunners have variable skill levels which improve with every successful mission, thus promoting campaign games. MB **SPACE CRUSADE** *
From beyond the toxic Warp forgotten starships, captured by the Warp and infested with Chaos, drift into Imperial space. Most of these vessels have been lost for thousands of years, and now they return bearing a cargo of corruption - Chaos abominations intent on destruction! It is the Space Marines' task to board these poisoned derelicts and cleanse them of their noisome inhabitants. 2 to 3 players choose a Marine squad and equip it with an assortment of heavy & melee weapons. Another player controls a host of Chaos spawn (Orks, Gretchin, Androids, Chaos Thugs, Genestealers & the dreaded Dreadnought!) who must destroy the hated Marines. This hectic hack 'n' splat boardgame includes 50 plastic Citadel miniatures (25mm scale), 12 scenarios, plus cardstock three-dimensional bulkheads & doors. Fun. **$40.00**

GAM **SPACE FLEET** *
A very basic ship-to-ship combat game for two to four players. The object is to scoot around the star-spangled map, blowing enough holes in your opponent's vessel(s) to make breathing impossible for the butt-suckers inside! This is actually quite engrossing: players must out-maneuver the enemy (simultaneous movement) so that major weapons face a target. All ships have their own shield configuration, enemy fire must punch through this before critical damage is sustained. Simple yet fiendishly addictive - includes four nifty plastic ship miniatures. **$35.00**

GAM **ULTRAMARINE** *
Two to four players lead a squad of Marine Scouts through the steel labyrinth of a derelict space hulk, searching the rusty corridors & silent crypt-like rooms for alien artifacts. The mechanics are fast 'n' simple, involving lots of bloodshed, & such things as variant event cards (what you find, what finds you, etc), vicious hand-to-hand melee, and flesh-blasting ranged combat (with bolter pistols, vortex & frag' grenade, plus hellfire rounds!). Components include 20 plastic 25mm Citadel miniatures, and a whole mess of laminated cardstock floorplans. **$25.00**

FANTASY

MB **BATTLEMASTERS** *
Okay, this is really a kids game, aimed at ages 8 and up, and the rules are simplified to the point of stupidity, but aside from that, the game is really worth considering. The components are absolutely without compare: a full color, hex grid vinyl map that is 4.5 feet by 4.75 feet, 103 plastic figures, including 1 Ogre champion, 6 gobbo wolf riders, 3 mtd chaos knights, 10 orc swordsmen, 10 gobbo swordsmen, 10 chaos beastmen, 10 chaos warriors, 10 chaos archers, 9 Imperial mtd knights, 3 Imperial mtd Lords, 15 halberdiers, 10 archers, 5 crossbowmen, 1 huge cannon & crew. Other items include a pastlic tower, plastic movement trays, heaps of tokens and playing cards, etc. If you don't like the rules, it would not be difficult to either adapt them, or even use some other rules such as Warhammer Fantasy Battle. But either way, the game's well worth the figures **$99.00**

MB **HEROQUEST** **
1 to 4 bold adventurers plunge into an endless succession of dungeons, driven by avarice alone, they face the hideous hordes of Morcar the Evil Wizard. This great introductory game features rather basic roleplaying mechanics (simple character sheets & skills, a 'Dungeon Master' hiding behind a screen who controls the bad guys & cheats with dice rolls, plus a mindless vault-to-vault orgy of treasure huntin' & monster slaughtering). Components include 35 plastic 25mm Citadel miniatures (8 Orcs, 6 Goblins, 3 Fimirs, 4 Chaos Warriors, 1 Sorcerer, 1 Gargoyle, 4 Skeletons, 2 Zombies, 2 Mummies, 1 Wizard, 1 Barbarian, 1 Dwarf & 1 Elf!) various bits of carboard 'n' plastic furniture, a colourful mapboard, etc. Mechinics feature magic spells, buying equipment, traps, missile fire, & wandering monsters. **$60.00**

miniatures, some map-overlays, 15 spell tokens, and 7 Quests. **$29.00**

GAM **ADVANCED HEROQUEST** ***

This is a multiplayer roleplaying boardgame - one player becomes the Gamesmaster (who controls the monsters), the other participants are the adventurers seeking fame & fortune. The Gamesmaster lays out room & corridor tiles as our greedy heroes traverse the dank chambers in search of loot (and skulls to bash in!), thus the dungeon's shape remains un-known until explored. The 64 page rulebook covers exploration, secret doors, traps, sentries, missile fire, critical hits & fumbles, fate points, magic spells, magic treasure, 9 character & creature attributes, traps, random events between adventures, training, buying equipment, solitaire rules, etc. An ideal campaign game where players aspire to become heroic legends, or at least get filthy rich! Can be used in conjunction with HEROQUEST. Components include 36 plastic Citadel miniatures, various markers, & a mess of beaut room tiles. **$75.00**

BTRC **MACHO WOMEN WITH GUNS** **

This bizarre production is a simplistic beer 'n' pretzels marriage of roleplaying character creation and wargame violence. The title aptly encompasses the rather shallow theme of play: Step 1 - create young buxom female characters (all you boys with stereotypical sexist pinups from Picture or People magazine have an advantage here), and choose a scantily illustrated counter that best reveals her attributes; Step 2 - arm them with an array of splatter-frenzy, phallic hardware; Step 3 - put the counters (with the adolescent-fantasy artwork) on the map & blow the crap out of everything that moves! Contains 10 pages of rules, two A4 maps, 52 counters, & a bizarre 4 page scenario. **$8.50**

RENEGADE NUNS ON WHEELS

AH **TITAN** **

A ripsnorting fantasy slugfest for 2 to 6 players, each of whom becomes a Titan vieing for domination. These Titans move about the abstract 16"x22" Masterboard trying to muster the largest legion of fantastic beasties - in each terrain-locale on the Masterboard a new critter can try to be be coerced into a legion. When opposing legions clash on the Masterboard play is transfered to one of eleven 8"x11" Battleland maps (dependent on the terrain-locale in which they collided) where a tactical brawl develops. With every victory a Titan becomes more powerful, and may continue to attract recruits. As you can read, this is little more than a glorified, dice-flingin', beer-guzzlin', splatterfest frenzy, but it's fun! The mechanics are simple, and include teleportation, rangestriking, summonong angels, etc. With 621 large, attractive counters. **$65.00**

ORI **WING COMMANDER PRIVATEER**

Oi! I'm not a fantasy boardgame! I'm a computer game, so what am I doing here? Well, that's quite true. This title is in fact a computer game for the IBM PC. It arrived into stock after I had done the computer game section, and since it is one of the best computer games I've ever played, I knew I just had to tell you something about it. (Until now I had named *Space Hulk IBM* as the best computer game of the year. But I think that *Privateer* maybe just beats it, or comes dead-even.)

Privateer is set in the WING COMMANDER universe, in 2669, set in the Gemini sector on the border with the Kilrathi empire, with the other border being unexplored space. You start the game in a little merchant scout ship inherited from your grandfather - and as to be expected, it is a piece of junk. You start off in the Troy star system on the agricultural planet Helen. There are two mining bases also in the system. The first thing you have to do is start making money, for this entire game revolves around making a profit. So you go to the commodity exchange on Helen and using some of the $2,000 you start the game with, buy up some food. Then you launch into space, fly over to one of the mining bases, go to their commodity exchange, and sell the food. From this you'll have made a profit of around $400. (Prices fluctuate wildly. Grain can cost anywhere from $12 - $18.)

Money in pocket - now we can upgrade our rust-bucket of a ship! First you'll need another laser, as your ship only starts with one. That's $1,000. The next two things you'll need are an afterburner ($1,500) and Tungsten armor ($1,500.) Of course, you'll need to do a few runs before you can afford it. So load up your ship with iron from the mining base, around $26 per unit, fly back to the agricultural planet, and sell it for around $50 per unit. Back to the ship yard for the next update!

There are 50 planets and bases in 70 star systems for you to explore and do business with. Once you've bought a jump drive, you can go anywhere, but I recommend that you upgrade your ship to the max first - it's tough out there! There are four ways you can make money. Firstly, you can load up on cargo of your choice, as above, and sell it where you please. Second, there is a mission computer (local fixer) that gives a whole variety of missions, both ferrying goods and chasing pirates. Thirdly, you can join the mercenaries guild, and they give you top paying dollars for clearing nav points of pirates or Kilrathi, or hunting down pirates or rogue bounty hunters with a bounty on their head. Fourthly, you can join the merchant's guild, and earn top dollars ferrying goods from star system to star system.

One of the best aspects of the game is that although it contains a campaign, you don't have to start it until you are ready. I did over 100 missions of my own choice, earning enough money to buy the next ship class up, before I braved the unknown by leaving my star system and starting the campaign. The campaign was around 24 missions, and once I solved that, the game just keeps going. So now I am just potting about exploring star systems (I've found two hidden pirate bases) and making a mint as a merchant and mercenary. You can even *be* a pirate.

Graphics are absolutely stunning, and game play is challenging and satisfying. The campaign contains some missions that are near impossible (one of the last missions took around four hours of continued attempts), but if you get sick of trying, don't worry about it. Just go back to being a freelance merchant and mercenary, making money so you can buy more upgrades for your ship, and then the next ship up. *Requires: IBM 386DX/33 or better, 4 meg RAM, 20 meg on hard disk, VGA, 3.5" 1.44 meg FDD.* **IBM - $99.00**
